I'd love to review this game, but I never got it to run. After forcing it to quiet after it stopped responding while the game was loading, I uninstalled it.. It seems like swell idea but mouse control does not work i just finished whole tutorial locked to starting view.. The quality of this Game's port actually makes this Game harder to run than Crysis

Great, Memorable Childhood Game tho. Look, there is nothing *wrong* with this game, everything works, no major bugs or anything. The issue is that it is more simplistic than similar games (none of the innovations one would expect from offerings of the last 5 or so years), the puzzles lack depth, there are no tactics to speak of, and no control over character progression after picking a class. The biggest issue is that you can stroll through the entirety of the game in <5 hours. For a game asking \$10, that is just an unacceptable amount of playtime imo.. The tutorial was kinda fun...

Then when u go online against other players this horrible creation shows its true disfigured face of disgust.

VOMIT. If you're planing to play this game with a controller, the controller it's not completely working, it's not functioning properly, so you have to use both the controller and the keyboards to play the game.

For that reason I do NOT recomend you to buy this game.

I hope this helps.. Atmospheric music mixed with comprehensive learning mechanisms makes this game so much fun.

could have been great - but looks like its dead in the water.. A game that has all the characteristics that define an old school retro FPS but falls short of high expectations.

Throughout my entire playthrough, I never felt as though I was playing a 90's FPS game. It's a game you can tell is made in Unity right from the jump. That's not at all a good thing but it's not all bad either. It felt sluggish and slow in comparison to games like DOOM and Quake and doesn't really deliver when it comes to the speed and ferocity you'd expect from those kind of games. If you give up on the expectation of getting another Quake clone, it becomes quite enjoyable for what it is.

I really dislike the way the developer chose to spam monsters, it doesn't feel fluid, especially at the highest difficulty, you'll find yourself running into a room and having 20 super strong crocodiles spawn right next to you which can mean instant death or hopping backwards repeatedly killing them all from a distance. At first I was enjoying the challenge but it happens far too often and soon becomes tiresome.

I was quite impressed with the Pixelize and Fractured Animation options that were presented, as well as things like a FOV slider (though needs numbers) and a Simple UI option, which made the game a whole lot more immersive and enjoyable in my opinion.

I would love an option for Ultrawide resolutions, especially 21:9 as that's what I'm currently using. I've never been fond of vertical black bars. The options menu also needs some bug fixes, changing options mid-game can be very hazardous, as well as it not always remembering keybinds and settings. Aside from these minor annoyances, the game doesn't have any game breaking bugs, which is always a positive in my book.

Overall, Apocryph is a decent arcade style FPS with a wide variety of super weapons, monsters and levels to power through. Just don't expect another perfect Quake clone like DUSK.. Bohemia Interactive have such a bizarre, all-over-the-place catalogue you can never really tell what you're going to get. Naturally they have the Arma series which is fantastic... they also published the UFO games which, back in the day, were great X-Com clones which have since been surpassed by games like Xenonauts but aren't bad games.

Then there's trash like this. It comes off as an Eastern European teenager's first Unity game. The animation and controls are awful. If the game moved even 15% faster it might be enjoyable but the pacing is sooooo slow. The very first mission has you walking at a snails pace across boring, empty farmland fighting the same 3 zombies over and over and over... collecting coins for... something? I haven't gotten far enough to use them.

The plot is laughable in a bad way. The jokes MOSTLY all fall flat. I did chuckle a few times but I think it was more because I couldn't believe the line of dialogue was in a game. I played for about 30 minutes and honestly have no clue what the game is about other than fighting zombies. I don't know who the main character is, where he's at, or why any of the game is happening. A+ stuff.. Another GOTY contender by Quiet River. Nice logic puzzler with relaxing music.

The achievements are working, but the UI is a bit messed up sometimes.

It's F2P, so give it a try if you like boolean puzzle games.. This is a late decision for me as I wanted something to play at home with the family at Christmas and liked the idea of two player co op puzzles. I was really not disappointed. This is now one of my favourite games in VR. I recommend it if you want to play and involve someone outside the headset, this is one of the best. Excellen puzzles and great coop needed to complete the levels. Team building application if ever I saw one :)

Really great title. Nice artwork and story, and brilliant puzzles. I hope they add more foir when I have completed it.

This is one of the best uses of VR I have seen and the mechanics are great. Couple of tiny glitches/bugs, but nothing terrible and the respawn points are in good positions.

Really worth the money.
