[Re: \[refresh Austin: 5132 Diff Tool For Mac](#)

The screenshot shows the Transmission torrent client interface. The main window displays a list of torrents, with columns for filename, size, progress, and speed. The list includes various Debian ISO files for amd64 and i386 architectures, including CD, DVD, and live desktop versions. The status bar at the bottom indicates 46 torrents, with 5 downloading, 18 seeding, and 23 paused. The current sort order is by name.
